MANAGEMENT DISCUSSION AND ANALYSIS(MDA)**Global Economy**

According to the World Bank, global GDP will grow at 2.9 per cent in 2016, after growing at 2.4 per cent in 2015. Growth rate is expected to move up to 3.1 per cent in 2017. The estimates by International Monetary Fund (IMF) are a little more optimistic than the World Bank projections. IMF expects global economy to grow by 3.2 per cent in 2015 and by 3.5 per cent in 2016.

There has been major fall in global commodity prices such as Crude Oil, Steel, Base Metals, Iron Ore, Coal etc. This has augured well for countries which are net importers of commodities. Economic growth in Advanced Economies (AEs) has been stable, however, major Emerging Markets & Developing Economies (EMDEs) other than India continue to witness slowdown in growth. Going forward the IMF's report has projected that global GDP growth will stabilize around current levels and is projected to be 3.2% in 2016 and 3.5% in 2017.

Indian Economy

India is presently the fastest growing economy in the world. IMF's global economic forecast has identified India as the "bright spot" amidst a bleak global economy. This year's Economic Survey describes India as a "refuge of stability and an outpost of opportunity" at a time of global turbulence and volatility. India grew 7.2 per cent in 2014-15 and 7.6 per cent (advance estimate) in 2015-16. For 2016-17, the Survey pegs the GDP growth at between 7 and 7.75 per cent, quite a broad range keeping in mind the interplay of a number of domestic and international factors.

The Government of India has done well in adhering to the fiscal targets, initiating a number of national schemes and structural reforms, expanding the scope of the direct benefit transfer scheme, re-starting stalled projects besides stepping up public investment in infrastructure projects and ushering in a sense of competitive federalism.

Low international oil prices have helped in containing inflation and currency has also remained stable. Also, Foreign Direct Investment (FDI) figures are at an all-time high touching USD 51 billion during April-February 2015-16. However, Indian economy has to deal with several challenges. The central government has started a number of initiatives such as Make in India, Smart Cities, Enhancing ease of doing business etc. to boost the economic growth in India. Additionally, enhanced infrastructure spending, pick-up in industrial activity, an improved investment climate and a rebound in rural economy on the back of an above average monsoon are expected to further strengthen growth.

The fall in the crude oil prices has further helped the economy, leading to a fall in inflation with WPI remaining in the negative territory for the complete year 2015-16. With inflation well in control, during the year (from April 2015 to April 2016) the Reserve Bank of India has reduced Repo Rate by 100bps. This is expected to further provide support to the economic growth

India is set to become the world's fastest-growing major economy by 2016 ahead of China, the International Monetary Fund (IMF) said in its recent latest forecast. India is expected to grow at 6.3 percent in 2015, and 6.5 per cent in 2016 by when it is likely to cross China's projected growth rate. India's macro-economic prospects have strengthened and the

country is best positioned among emerging market economies, gaining global investor's attention.

Indian Textile Industry

India's textiles sector is one of the oldest industries in Indian economy dating back several centuries. Even today, textiles sector is one of the largest contributors to India's exports with approximately 11 per cent of total exports. The textiles industry is also labour intensive and is one of the largest employers. The industry realised export earnings worth US\$ 41.4 billion in 2014-15, a growth of 5.4 per cent. The textile industry has two broad segments. First, the unorganised sector consists of handloom, handicrafts and sericulture, which are operated on a small scale and through traditional tools and methods. The second is the organised sector consisting of spinning, apparel and garments segment which apply modern machinery and techniques such as economies of scale. The close linkage of the textile industry to agriculture (for raw materials such as cotton) and the ancient culture and traditions of the country in terms of textiles make the Indian textiles sector unique in comparison to the industries of other countries. The Indian textile industry has the capacity to produce a wide variety of products suitable to different market segments, both within India and across the world.

Indian Dying & Printing Industry

Textile processing is one of the important industries related with textile manufacturing operations. Textile processing is a general term that covers right from singeing (protruding fiber removal) to finishing and printing of fabric. The various steps a fabric goes into are singeing, desizing, bleaching, dyeing, and finishing. Bleaching is a process to make the fabric or yarn look brighter and whiter. Dyeing is a process of applying coloring matter directly on fiber without any additives. Finishing is the final process to impart the required end use finishes to the fabric and lastly the printing process on fabric which is a science as well as an art. Textile auxiliaries such as chemicals are used for all stages of the textile manufacturing process that is from pre-treatment to dyeing and printing and finishing.

The textile industry is classified into (i) textile mills comprising composite and spinning mills in the organized segment, (ii) small powerloom and handloom units in the decentralized segment, (iii) khadi-based units, (iv) manmade and synthetic fibre and spinning units, (v) knitting units, and (vi) made-ups (garments). Besides, the industry has a large number of small units scattered all over the country which are engaged in processing, dyeing and printing of yarn, fabrics and for conversion. The processing units include sizing, desizing, kiering, bleaching, mercerizing, dyeing, printing and finishing.

Over the years, we have developed capabilities to customize and improve our product designs by absorbing, adapting and improving the acquired technology from both national and international suppliers. We are continuing to enhance the operational efficiency of our plants leading to higher value creation.
